

Lubricant Manufacturing

Midland Oil offers an extensive range of high performance lubricants covering a wide range of application areas. Our blending operations can manufacture almost any grade of industrial, metalworking or automotive lubricant in batch sizes to suit individual requirements.

Whilst marketing a comprehensive range of lubricants under the Midland Oil brand identity we extend our lubricant manufacturing service to provide products to customers' own formulations if required. Our dedicated product filling and labelling facilities also provides a wide scope in available package sizes and design combinations enabling Midland Oil to offer customers own label packaging.

- Midland Oil manufactures and markets a comprehensive range of industrial, metalworking and automotive lubricants
- Midland Oil Halesowen is an ISO 9001:2000/ ISO 14001:2004 accredited site
- Midland Oil has an extensive customer base in the UK and exports to countries worldwide
- Provides a bespoke manufacturing, technical support and filling service for own label customers

Industries

- Production Engineering
- Automotive
- Aerospace
- Heat Treatment
- Fluid Power - Hydraulic
- Plastic Injection Moulding
- Power Generation
- Oil & Gas Production
- Civil Engineering
- Building Products
- Offshore Power Industries
- Shipyards
- Metal Processing (Bailers)
- Steel & Alloy Manufacturing

Distributors of
Fuel Oil, Lubricants, Chemicals

Lubricant Manufacturing

Manufacturing of speciality industrial and automotive lubricants has been developed at Midland Oil over the last 50 years. During the last 10 years inward investment has reached £2.5 million as new blending, filling and warehousing facilities have been added to its established refining and distillation plants.

Unless specified by our customers, the Midland Oil brand of lubricants are manufactured using selected high quality refined virgin base oils in combination with recognised high performance, approved additive packages. At every stage of the manufacturing process our in house technical team provide the highest quality control standards to both raw materials and finished product to ensure the accredited IS 9001 standards are attained.

Midland Oil offer market leading flexibility of service and are able to make direct deliveries of all lubricant package sizes including bulk on its own specialised transport fleet anywhere in the UK. Overseas customers benefit from our onsite container loading facilities to ensure goods arrive at their destination on time and in good condition.

The Midland Oil range of speciality lubricants include

INDUSTRIAL OILS	Hydraulic	Morpress AW, AWG, P, HVI ISO 5 - 320 <i>viscosity range</i>	A high quality, comprehensive range of hydraulic oils, formulated to prevent wear, oxidation, corrosion and foaming. Range includes zinc-free, high VI, zinc containing, low pour point in viscosity range from ISO 5 - ISO 320.
	Gear	Morgear EP 68 - 680 <i>viscosity range</i>	Extreme pressure lubricants that provide outstanding protection for heavily loaded industrial gears and bearings, even under high torque and shock load conditions.
	Lubricating	Morlube 10 - 680 <i>viscosity range</i>	A high quality, comprehensive range of general lubricants with inherent resistance to oxidation.
	Slideway	Morlube S 32 - 680 <i>viscosity range</i>	High film-strength lubricants with excellent resistance to displacement for use in horizontal and vertical slideways.
	Multipurpose	Morlube SH 32 - 680 <i>viscosity range</i>	A versatile range of multi-purpose lubricants achieving the high performance levels usually associated with mono-functional oils. Suitable for use in gears, bearings, slideways and hydraulic systems.
	Compressor & Turbine	Morcomp, Morpower 32 - 150 <i>viscosity range</i>	Petroleum derived, developed to provide superb performance for use in air compressors and turbines.
PRODUCTION OILS	Neat Cutting Oils	Morcut Envirocut (<i>refer to Environmental brochure</i>)	A range of neat oils ranging from general purpose to heavy duty formulations, suitable for a wide variety of machining and grinding operations.
	Water-Mix Cutting Fluids	Morsol	A range of soluble oils, micro emulsions and synthetic solutions covering applications from general purpose to heavy duty, suitable for a wide variety of machining and grinding operations.
	Heat Treatment	Morquench	Full range of heat treatment products that cover all aspects of its industry including accelerated, non-accelerated and hot quenching oils.
SPECIALITY ANCILLARY	Mould Release	Mormould	Concrete and metal release agents for construction industry.
	Chain Saw Oil	Morchain	Variety of viscosities of cutter bar lubricants.
	Grease	Morgrease	Range of multipurpose greases.
	Water Based Cleaners	Morclean	Water based floor, wall and TFR cleaners.
	Solvent Cleaners	<i>(refer to Solvent Recovery brochure)</i>	
AUTOMOTIVE OILS	Commercial Engine Oils	Morfleet	Range of heavy duty commercial lubricants meeting the latest EURO engine emission and API requirements.
	Passenger Car Oil	Morsynth	Range of passenger car engine oils meeting and exceeding OEM requirements.
